"IF YOU WISH TO GAIN FINANCIAL FREEDOM EARLY IN LIFE, YOU NEED TO CHANNEL THE CONVENTIONAL APPROACH AND START PLANNING TODAY": VIJAY THAKKAR

Yashoda Technical Campus had organized a 'Aatmanirbhar' program of Vijay Thakkar for the students. The objective of the program was to render the Financial Independence awareness to the students. The key points discussed in the program are as follows:

Financial freedom is generally assumed to be 'a state in which an individual or household has sufficient wealth to live on without having to depend on income from some form of employment. Financial freedom is the state where an individual can easily pay off his/her living expenses since they have enough income sources that allows them not to be dependent on others. After getting this freedom, money is not the dominating force in their personal life. In other words, at this point, an individual is free from worrying about the source of their income. We are aware of the importance of financial independence for married or aged people. However, not many people are aware that it is also essential for college going students or youngsters.

Students often think of following their hobbies along with their studies. However, they often don't have enough resources and savings to afford their dream hobbies. Therefore, they have to depend on their parents to pursue their hobbies. On the other hand, a financially independent student has ample opportunities to afford hobbies such as travelling, sporting events etc. A financially independent person can also involve in pursuing music, art or photography. Students can use these skills to earn money or help others. However, they should use their monetary resources efficiently, and shouldn't just go around wasting their money on non-resourceful things or activities.

Dr. V. K. Redasani welcomed Shri. Vijay Thakkar by offering memento, the program was organized and coordinated by Randhirsinh Mohite. The alumni of MBA department Mr. Abhijeet Sawant availed this opportunity for the students of Yashoda Institutes, Satara. Faculties, Students of various departments of Yashoda Technical Campus were present on the occasion.

Aim:

The aim of the program was to make students aware with real life projects and interact with architectural fraternity.

Objective:

To make students aware with the current professional designs and interact with the eminent Architects in the industry.

Introduction: Indian Institute of Architects, Satara Centre hosted a presentation Opolis architects, Ar. Sonal Sancheti and Ar. Rahul Gore, who shared their insights and experiences with the students. The presentation covered various topics, including their design philosophy, their design process, and their notable projects. The presentation was followed by an interactive session between the architects and the students.

Presentation: The presentation by Ar. Sonal Sancheti and Ar. Rahul Gore began with an introduction to their design philosophy. They explained that their approach to architecture is rooted in sustainability and context sensitivity. They believe that a building should respond to its surroundings and respect the environment. They also emphasized the importance of collaboration and communication in the design process. The architects then discussed their design process, which involves extensive research and analysis. They explained that they spend a lot of time getting to know the site and the context in which the building will be situated. They also talked about the importance of engaging with stakeholders, such as the community and the client, to ensure that the building meets their needs and expectations. They also shared their experience of working with world renowned architects like Ar. Fumihiko Maki, Ar. B. V. Doshi who are Pritzker prize laureates.

Finally, the Ar. Sonal Sancheti shared some of their notable projects, including House in Panshet, House on Ridge, House at Khadakwasala and Ar. Rahul Gore shared his experience with working on Bihar Museum competition from inception to the completion. They explained the design concepts behind each project and shared photos and drawings to illustrate their ideas.

Interactive Session: Following the presentation, the architects engaged in an interactive session with the students. The students had the opportunity to ask questions and share their own ideas and perspectives on architecture. The architects responded thoughtfully to the students' questions and offered advice and guidance.

Some of the topics discussed during the interactive session included:

The architects' views on the role of technology in architecture

The challenges of designing for sustainability in different contexts

The importance of balancing aesthetics and functionality in building design

Conclusion: Overall, the presentation by Opolis Architects and the subsequent interactive session provided valuable insights and inspiration for the students. The architects' emphasis on sustainability, context sensitivity, and collaboration resonated with many of the students, who expressed their appreciation for the opportunity to learn from such experienced and thoughtful architects.
